

## PACK A TRUCK

Movers throw items onto the truck. Pack as many of those items as possible.

Points are scored for packing items that are past or almost past the line on the bottom of the truck. Additional points are scored for items that are touching -- packed tightly. Larger items are worth more, and round items are worth additional points. Destroyed toy planes earn as many points as (or more than) the largest packing item. Hit the toy planes (with enough force) multiple times with packing items to destroy them.

Objects emit light when selected. Move items with Left, Right, To Me, Up & Away, and Random Move buttons. Adjust Force in the menu lets the player decrease or increase the amount of force applied to packing items when moved.

To select a packing item, click or press on it. With Multi-object Selection in the menu checked, player can select more than one packing item at a time. Hold down the button longer (up to a point) to add more force.

Use the Control New button to select items that appeared recently. Other items already selected will be unselected.

To play a game, select from 30 different games using the slider at the top of the main game screen. Then press Start. When a game is completed, the Game Over screen appears with a New Game button.

Some sample good scores:

Game 1: 180,000; Game 2: 370,000; Game 3: 250,000

Game 4: 470,000; Game 5: 1,000,000; Game 6: 1,250,000
